running install
running build
running build_ext

Python build finished successfully!
The necessary bits to build these optional modules were not found:
_dbm   _gdbm   _uuid
nis
To find the necessary bits, look in setup.py in detect_modules() for the module's
name.

The following modules found by detect_modules() in setup.py, have been
built by the Makefile instead, as configured by the Setup files:
_abc   atexit   pwd
time
